RE: Recommendation letter for Noah McCoy

To Whom It May Concern,

I am very pleased to write this letter of recommendation for Noah McCoy concerning the USNC 2024 IEC Young Professionals Competition. Noah McCoy has worked for me since May 2023 as a Product Safety Engineer, focusing on Electromagnetic Compatibility, Electrical Safety, Testing & Certification, support of an accredited IEC CTF, writing IEC CB reports, interpreting requirements, and identifying potential improvements within the safety standards themselves. Within 6 months, Noah's subject-matter expertise quickly impressed both me and also other managers and directors. Noah has become a valuable member of this team and has developed a keen interest with the standards themselves and how we, as a national committee participate in the evolutions of standards considering emerging technologies or those technologies that impact all committees.

While under my supervision, I've witnessed Noah leverage his background to participate in third-party reviews with an acute eye towards the overall safety, not limiting his observations to the requirements just within the standards but expanding the scope of his vision to include both foreseeable and unforeseeable misuse. These observations led to design improvements for the overall safety of end users.

On more than one occasion, Noah has gone above and beyond in his expected duties, bringing to my attention observations he has made regarding safety standards or white papers that led to an overall shift in corporate understanding of certain topics. Noah has even developed and presented topics of interest bridging other industries and technologies at our engineering meetings and found ways to highlight how we can learn from others and improve our own processes.

Noah has established an excellent rapport within the company across multiple levels and functions. Noah is becoming highly respected and a go-to individual when something concerning standards or wiring codes (NEC, CE Code, etc.) requires a decision. I would strongly recommend Noah for the future of the USNC through the IEC Young Professional program. If you have any questions or require further information, please do not hesitate to contact me at 530-961-2798.

Sincerely,

Joseph McGuire, P.E.
