Total comments received : 5

ACTION

CAB is invited to note the comments.

Originator: CAB Secretariat

COMMENTS

Member	Sequence	Comments
Sterling Joan	1	Agree to the liaison with SC 42. However, suggest recommendation A1 should read: A.1. To establish an official liaison between ISO/IEC JTC 1, SC42 and the CAB TF AI to provide an updates to each other of the work of CAB TF AI and SC42
Sterling Joan	2	Agree with the addition of "near" to ToR, however adding "products, systems, and services" to the end of the sentence for clarity. A.2. Change a) in the ToR to read: To identify product sectors that currently, or may in the near future, utilize Artificial Intelligence (AI) in products, systems, and services.
Takahashi Hiroshi	1	I agree with A1, A2.
Vagdia Rajeev	1	Support both recommendations. Suggest taking comments from Joan Sterling into consideration when agreeing the final text.
van ZantenThijs	1	Agree with both recommendations A1 and A2.
