ANSI: Mr. Xu Fang, Chief Representative in China
Email: us-chinasccp@ansi.org

Based on Jiangsu's development plan, there will be more than 100 large-scale data center users moving into the province including China's leading companies. This workshop aims to match local businesses with leading US technology companies to help promote products and services that improve data center energy efficiency and standards. The workshop will also provide opportunities for US companies to meet and interact with key players in the Jiangsu province and nearby regions. The workshop will address topics such as the development of big data industry in Nantong and a panel discussion on innovation and practices of green and efficient data centers in US and China, amongst other issues.
