

U.S.–INDIA SCCP

# Smart Cities Conference: 5G Network Technologies, Applications, and Standards

## U.S.-India Standards and Conformance Cooperation Program (SCCP), Phase II

5G is at the forefront of the next generation of networks. New intelligent networks will greatly impact the development of smart cities and green buildings in the coming years. To meet these challenges and customer expectations, we must prepare for a secure, dynamic network to provide the next level of customer experience.

The Smart Cities Conference will bring experts in technology and standards together to discuss how standards can support technological innovations to be more efficient and secure. Standards are key to enable the high-performance wireless networks that will allow for the implementation of new services to improve business efficiency, resource efficiency, and quality of life. It will also be a great opportunity for industry, government and SDO's to collaborate in building standards to accelerate India's evolving infrastructure.

**September 5-6, 2019**

9:30 AM – 5:30 PM  
The ITC Windsor  
Bangalore, India

Registration is required – to save your seat, please visit: <https://cvent.me/e170o>
