

## U.S.-AFRICA CLEAN ENERGY STANDARDS PROGRAM

Sponsored by the U.S. Trade Development Agency (USTDA) and coordinated by the American National Standards Institute (ANSI) in partnership with Power Africa, the **U.S.-Africa Clean Energy Standards Program (CESP)** provides a forum through which industry and government representatives from the U.S. and Sub-Saharan Africa can:

- Cooperate on issues relating to standards, conformity assessment, and technical regulations for clean energy technologies;
- Foster the relationships necessary to facilitate U.S.-Africa technical exchange on standards, conformity assessment, and technical regulations; and
- Exchange up-to-date information on the latest issues and developments relating to standards, conformity assessment, and technical regulations in the clean energy space.

Beginning in 2016, ANSI will coordinate an initial 4 workshops over an 18-month period in Sub-Saharan Africa under the CESP. The workshops will cover a wide range of technologies and challenges in the clean energy area. Workshop topics will be chosen in coordination with relevant industry associations, ANSI, and USTDA.

To learn more about the U.S.-Africa CESP or to express interest in sponsoring or participating in a workshop, please visit our website at:
