

U.S.-AFRICA CLEAN ENERGY STANDARDS PROGRAM

Solar Mini-Grids Workshop: Regulatory Framework and Quality Assurance

Approximately 30 percent of the Kenyan population has access to the national electrical grid. For those who do not, particularly in rural communities, solar mini-grids have emerged as an alternative to traditional grid infrastructure. This workshop will feature presentations by U.S. and Kenyan experts from both the public and private sectors on key aspects of solar mini-grid system development, including customer billing, quality assurance, and integration for mini-grids. It will foster discussion on opportunities in the Kenyan market as well as crosscutting issues affecting other East African markets and beyond.

September 29, 2016

9:00 AM – 5:00 PM

Safari Park Hotel, Nairobi, Kenya

To register, email us-africacesp@ansi.org. Kindly indicate name, title, organization, contact email and telephone number.

The U.S.-Africa Clean Energy Standards Program is sponsored by the U.S. Trade and Development Agency and coordinated by the American National Standards Institute in partnership with Power Africa. More information is available at www.standardsportal.org/us-africacesp.
