

GET IN THE FAST LANE

ANSI **Internship Program** **in Washington, DC**

Are you excited about a career in international business?

Are you looking to develop practical skills and work experience to prepare you for future employment?

Spend a few months working with the American National Standards Institute (ANSI) to build international business experience and learn how key components of standards, conformity assessment, and trade impact the global marketplace.

ANSI is currently looking for university students or recent graduates for intern positions in its Washington, DC, headquarters. The Institute is particularly interested in candidates with the following characteristics:

- Interest in international relations, marketing, communications, or business
- Ability to work independently and identify new opportunities
- Initiative and ability to adapt quickly to a fast-paced environment
- Experience with web design, HTML, or other programming languages

Contact us today for more information on current or future opportunities – and get your career moving in the fast lane!

"As an intern in ANSI's International Policy Department, I was able to apply my coursework in marketing, business communication, and web design directly to the international marketplace. I was also able to network with visiting delegations from across the globe, attend several government functions on behalf of ANSI, and gain practical business experience in an international setting. They even worked with me to develop a personal work plan that utilized my strengths and interests, and I gained valuable skills and insights into the global marketplace that I would not have received elsewhere. The experience and skills I developed at ANSI will be invaluable to my future career."

– Lindsay Lehman, ANSI Intern, Spring 2010
