Subject: Proposed revision to 3.2 Commercial terms and conditions -

Dear Anne:

My personal evaluation is that these revisions certainly make sense, and in essence clarify the intention of the original language. Also, they strengthen the purpose of the 'commercial terms and conditions' article in the Essential Requirements.

I believe that my Board of Directors would agree with my comments. However, I do not wish to burden them with yet another issue to appraise, unless ANSI needs a organization-wide approved statement – which I doubt.

(If my statements above do not make sense, then I clearly did NOT understand either the original language OR the revisions.)

Best Regards,
