

conference

02 November 2015, Geneva, Switzerland

About the conference

Learn about the many ways in which International Standards can support public policy goals at this IEC, ISO & UNECE conference! We will explore the benefits of referencing standards in regulations, how standards can help implement policy commitments taken at the global level (e.g. sustainability, resilience and development goals), and much more.

The event is a unique opportunity to connect national and international policymakers with standards developers, in order to share experience and best practices.

To learn more on how standards can help you, see the brochure: ['Using ISO and IEC standards to support public policy'](#).

Venue: United Nations 'Palais des Nations', Room XXI, Geneva, Switzerland.

See the registration website for more details.

Registration

To register for this event please go to: <http://www.cvent.com/d/9rqv3d>

There are limited places for this event. Registration is on a first come, first served basis.

Training

Please note that this conference is followed by a half-day training course on 'Using and referencing International Standards to support public policy'. The training course will be held at the offices of ISO/CS in Geneva. Please register separately for the training course. Details can be found on the event website: <http://www.cvent.com/d/9rqv3d>

About IEC, ISO & UNECE

The IEC and ISO are both independent, non-governmental, not-for-profit organizations that develop and publish fully consensus-based International Standards. The members of the two organizations include government, private and public-private entities. The IEC and ISO promote world trade and economic growth and encourage the development of products, systems and services that are safe, efficient and environmentally friendly.

The United Nations Economic Commission for Europe (UNECE) was set up in 1947 by ECOSOC. It is one of five regional commissions of the United Nations. As a multilateral platform, it facilitates greater economic integration and cooperation among its fifty-six member States and promotes sustainable development and economic prosperity.
