### American National Standards

#### Call for comment on proposals listed

This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically.

#### Ordering Instructions for “Call-for-Comment” Listings

1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

Standards Action - September 7, 2007

Comment Deadline: October 7, 2007

UL (Underwriters Laboratories, Inc.)

Revisions
- BSR/UL 484-200x, Standard for Safety for Room Air Conditioners (revision of ANSI/UL 484-2005)
- NFPA 99, (e) Non-Automatic transfer switches in accordance with NFPA 70 and NFPA 20; and (d) Automatic transfer switches and by-pass/isolation switches in accordance with NFPA 70;
- NFPA 70, (b) Transfer switches for use in optional stand-by systems in accordance with NFPA 70, and NFPA 99; emergency systems in accordance with the National Electrical Code,
- NFPA 99, (a) Automatic transfer switches and by-pass/isolation switches for use in ordinary locations to provide for lighting and power as follows:
- NFPE 10, (3) Exception to leakage current limit, in Clause 34.1, for computer room air conditioners; and
- NFPE 10, (1) Definition for computer room air conditioners;

Send comments (with copy to BSR) to: Jeff Prusko, UL-IL; jeffrey.prusko@us.ul.com

BSR/UL 558-200x, Standard for Industrial Trucks, Internal Combustion Engine-Powered (Proposal dated 9-7-07) (revision of ANSI/UL 558-1998)
- Provides revision to remove the all-metallic requirement with regard to the external fuel-confining parts of a filter.

Click here to see these changes in full, or look at the end of “Standards Action.”

Send comments (with copy to BSR) to: Megan Cahill; UL-IL, Megan.M.Cahill@us.ul.com

BSR/UL 1008-200x, Standard for Safety for Transfer Switch Equipment (revision of ANSI/UL 1008-2004)
- Covers automatic, manual, and by-pass/isolation transfer switches for use in ordinary locations to provide for lighting and power as follows:
- Automatic transfer switches and by-pass/isolation switches for use in emergency systems in accordance with the National Electrical Code, NFPA 70, and NFPA 99; (a) Transfer switches for use in optional stand-by systems in accordance with NFPA 70; (b) In legally required stand-by systems in accordance with NFPA 70; (c) Automatic transfer switches and by-pass/isolation switches in accordance with NFPA 70; and (e) Non-Automatic transfer switches in accordance with NFPA 70 and NFPA 99.

Click here to see these changes in full, or look at the end of “Standards Action.”

BSR/API RP-520-Part 1-200x, Sizing, Selection, and Installation of Pressure-relieving Devices in Refineries - Part 1: Sizing and Selection (new standard)
- Applies to the sizing and selection of pressure relief devices used in refineries and related industries for equipment that has a maximum allowable working pressure of 15 psig [103 kPag] or greater. The pressure relief devices covered in this recommended practice are intended to protect unfired pressure vessels and related equipment against overpressure from operating and fire contingencies.

Single copy price: Free

Obtain an electronic copy from: goodmanr@api.org

Order from: Valeen Young, API; youngv@api.org

Send comments (with copy to BSR) to: Roland Goodman, API; goodmanr@api.org

AAMI (Association for the Advancement of Medical Instrumentation)

New National Adoptions
- Provides requirements for mechanical sphygmomanometers and their accessories that, by means of inflatable cuffs, are used for the non-invasive measurement of blood pressure. This standard also specifies requirements for the safety, essential performance, effectiveness, and labelling for these instruments and their accessories, including test methods to determine the accuracy of their measurements.

Single copy price: $25.00 (Nonmembers)$20.00 (AAMI members)

Order from: www.aami.org

Send comments (with copy to BSR) to: Hae Choe, AAMI; hchoe@aami.org

API (American Petroleum Institute)

New Standards
- BSR/API RP 939-C-200x, Guidelines for Avoiding Sulfidation Corrosion Failures in Oil Refineries (new standard)
- Provides guidance on how to address sulfidation corrosion in petroleum refining operations. RP 939-C is applicable to hydrocarbon process streams containing sulfur compounds, with and without the presence of hydrogen, that operate at temperatures above approximately 475 F (245 C) to 1000 F (540 C).

Single copy price: Free

Obtain an electronic copy from: goodmanr@api.org

Order from: Valeen Young, API; youngv@api.org

Send comments (with copy to BSR) to: Roland Goodman, API; goodmanr@api.org

- BSR/API RP 941-200x, Steels for Hydrogen Service at Elevated Temperatures and Pressures in Petroleum Refineries and Petrochemical Plants (new standard)
- Summarizes the results of experimental tests and actual data acquired from operating plants to establish practical operating limits for carbon and low-alloy steels in hydrogen service at elevated temperatures and pressures. Applies to equipment in refineries, petrochemical facilities, and chemical facilities in which hydrogen or hydrogen-containing fluids are processed at elevated temperature and pressure. The guidelines in this recommended practice can also be applied to hydrogenation plants such as those that manufacture ammonia, methanol, edible oils, and higher alcohols.

Single copy price: Free

Obtain an electronic copy from: goodmanr@api.org

Order from: Valeen Young, API; youngv@api.org

Send comments (with copy to BSR) to: Roland Goodman, API; goodmanr@api.org

Comment Deadline: October 22, 2007

BSR/API Standard 936-200x, Refractory Installation Quality Control - Inspection and Testing Monolithic Refractory Linings and Materials (new standard)
- Provides installation quality control requirements for monolithic refractory linings and may be used to supplement owner specifications. Materials, equipment, and personnel are qualified by the methods described, and applied refractory quality is closely monitored based on defined procedures and acceptance criteria. The responsibilities of inspection personnel who monitor and control the quality control process are also defined.

Single copy price: Free

Order from: Valeen Young, API; youngv@api.org

Send comments (with copy to BSR) to: Roland Goodman, API; goodmanr@api.org
New National Adoptions

Provides standard testing procedures for evaluating proppants used in hydraulic fracturing and gravel-packing operations.

Single copy price: $25.00
Obtain an electronic copy from: Carriann Kuryla, API (Organization); kurylac@api.org
Order from: Carriann Kuryla, API (Organization); kurylac@api.org
Send comments (with copy to BSR) to: Same

Revisions

Covers the inspection practices for piping, tubing, valves (other than control valves), and fittings used in petroleum refineries and chemical plants. Although this publication is not specifically intended to cover specialty items, many of the inspection methods described in this recommended practice are applicable to specialty items such as: control valves, level gages, instrument controls, columns, etc.

Single copy price: Free
Obtain an electronic copy from: goodmanr@api.org
Order from: Valeen Young, API; youngv@api.org
Send comments (with copy to BSR) to: Roland Goodman, API; goodmanr@api.org

Describes inspection and repair practices for automatic pressure relieving devices commonly used in the refining and petrochemical industries. This publication covers such automatic devices as pressure relief valves, pilot operated pressure relief valves, rupture disks, and weight-loaded pressure vacuum vents.

Single copy price: Free
Obtain an electronic copy from: goodmanr@api.org
Order from: Valeen Young, API; youngv@api.org
Send comments (with copy to BSR) to: Roland Goodman, API; goodmanr@api.org

Covers the normal and emergency vapor venting requirements for aboveground liquid petroleum or petroleum products storage tanks and aboveground and underground refrigerated storage tanks designed for operation at pressures from vacuum through 15 psig (1.034 bar gauge).

This standard discusses the:
- causes of overpressure or vacuum;
- determination of venting requirements;
- means of venting;
- selection, installation, and maintenance of venting devices; and
- testing and marking of relief devices.

Order from: Global Engineering Documents; global@ihs.com
Send comments (with copy to BSR) to: Cecelia Yates, EIA; cyates@ecaus.org

HPS (ASC N43) (Health Physics Society)

New Standards

• BSR N43.1-200x, Radiation Safety for the Design and Operation of Particle Accelerators (new standard)

Sets forth the requirements for accelerator facilities to provide adequate protection for the workers, the public and the environment from the hazards of ionizing radiation produced during and from accelerator operations. This Standard also recommends good practices that, when followed, provide a level of radiation protection consistent with those established for the accelerator communities.

Single copy price: $12.50
Obtain an electronic copy from: HPS Business Office
Order from: HPS Business Office
Send comments (with copy to BSR) to: David Drupa, HPS (ASC N13); ddrupa@burkinc.com

ITI (INCITS) (InterNational Committee for Information Technology Standards)

New Standards

Draft INCITS 443-200x, Information technology - Fibre Channel - Storage Network PING (SNPing) (new standard)

Defines a Command Line Notifies (CLI) for a storage networking management utility program that is equivalent to the IP Networking Ping function. The CLI may be directly useful to storage management personnel or it may be accessed via other applications (e.g., an SMI-S Client).

Single copy price: $30.00

Send comments (with copy to BSR) to: Barbara Bennett, ITI (INCITS); bbennett@itic.org
Revisions

BSR INCITS 388-200x, Information technology - Storage Management (revision of ANSI INCITS 388-2004)

 Defines an interface for the secure, extensible, and interoperable management of a distributed and heterogeneous storage system. This interface uses an object-oriented, XML-based, messaging-based protocol designed to support the specific requirements of managing devices and subsystems in this storage environment. Using this protocol, this Technical Specification describes the information available to a WBEM Client from an SMI-S compliant CIM WBEM Server.

Single copy price: $30.00

NEMA (ASC C78) (National Electrical Manufacturers Association)

Revisions

BSR ANS/SLC 42-200x, High-Pressure Sodium Lamps (revision of ANSI C78.42-2004)

Sets forth the physical and electrical requirements for HPS lamps, to ensure performance and interchangeability. The data given also provide the basis for the electrical requirements for ballasts and igniters, as well as the lamp-related requirements for luminaries.

Single copy price: $240.00
Obtain an electronic copy from: Mat_clark@nema.org
Order from: Randolph N. Roy, NEMA (ASC C78); ran_roy@nema.org; mat_clark@nema.org
Send comments (with copy to BSR) to: Same

NSF (NSF International)

Revisions

BSR/NSF 62-200x (i1), Drinking water distillation systems (revision of ANSI/NSF 62-1999)

Issue 1 - The proposed revision updates the scope, normative references, structural integrity requirements, performance indication devices (PID), test waters and instruction and information. Requirements not pertaining to distillers are being removed. The document has also been restructured to be consistent with the Drinking Water Treatment Unit family of Standards.

Single copy price: $35.00

Send comments (with copy to BSR) to: Ronda Coulter, TIA; rcoulter@tiaonline.org

UL (Underwriters Laboratories, Inc.)

Revisions

Provides:
(1) Revision to abrupt removal test to correct the number of samples required;
(2) Revision of requirements to permit the grounding symbol with or without the circle;
(3) Revision of Note #2 appearing in figure 105.1 to specify a range of radius for the blades of the test gauge;
(4) Adoption of ANSI/ESTA E1.24 entertainment technology dimensional requirements for stage pin connectors;
(5) Revision to the overload test requirements regarding the fuses used in the test circuit; and
(6) Revision to marking requirements in table 163.4, reference 4.

• BSR/UL 987-200x, Standard for Safety for Stationary and Fixed Electric Tools (revision of ANSI/UL 987-2006)

The following items are subject to comment:
(1) Addition of construction, marking, and test requirements for motor-operated panel saws;
(2) Addition of construction, marking, and test requirements for motor-operated, or magnetically driven stationary or fixed tools powered by rechargeable battery, and the battery packs for such tools; and
(3) Revision of table saw requirements including:
- changes to address blade saw constructions;
- force criteria for riving knife, riving knife/spreader combination, and antikickback devices;
- linear measurement to determine rigidity of a riving knife and its holder;
- body thickness of a riving knife;
- allowance for faster and easier installation, adjustment, and removal of table saw parts;
- construction of a guard and an antikickback device attached to a spreader or riving knife/spreader combination unit to avoid risk of injury;
- allowance for easier adjustment or removal of an antikickback device; and
- other changes to table saw requirements.

BSR/ASME B31J-200x, Standard Test Method for Determining Stress Intensification Factors (i-Factors) for Metallic Piping Components (new standard)

Sets forth an engineering procedure deemed appropriate for the safe determination of the fatigue capacity of a piping component or joint in most services, relative to a standard butt welded joint. However, the procedure cannot possibly foresee all geometries and services possible and the use of competent engineering judgment may be necessary to extend the procedure to cover unusual geometries and service conditions or to ensure a safe testing environment.

Corrections

Corrections to Previous Final Actions Listings

INCITS/ISO/IEC 19784-1
This standard was listed in the Final Actions section of the April 20, 2007 issue of Standards Action as a reaffirmation. It is actually an adoption of the ISO standard.

INCITS/ISO/IEC 16449-2002 (R2007)

INCITS/ISO/IEC 11572-2000 (R2007)
This standard was listed in the Final Actions section of the July 27, 2007 issue of Standards Action with an incorrect designation and with incorrect status information. The correct designation is INCITS/ISO/IEC 11572-2000 (R2007), and the correct status information is "(reaffirmation of INCITS/ISO/IEC 11572-2000)".
Standards Action - September 7, 2007 - Page 12 of 26 Pages

Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

BSR/ADA Specification No. 28-200x, Root Canal Files and Reamers, Type K (revision of ANSI/ADA 28-2002)
Stakeholders: Manufacturers, practitioners, patients.
Project Need: Specification required updating to accommodate changing procedures.
Describes endodontic files and reamers having a working part taper of 2% (0.02 millimeter per millimeter of length) and standard sizes for use in endodontic preparation or shaping operations.
BSR/ADA Specification No. 71-200x, Root Canal Filling Condensers (Pluggers and Spreaders) (national adoption with modifications and revision of ANSI/ADA 71-2001)
Stakeholders: Manufacturers, practitioners, patients.
Project Need: This standard will be updated to address new techniques and technology.
Describes root canal instruments for finger, hand, or mechanical operation - used to compact root canal filling materials.
Stakeholders: Dentists, dental laboratories, regulatory agencies.
Project Need: To consolidate synthetic polymer teeth and ceramic teeth for dental prostheses into one document.
Specifies the classification, requirements, and test methods for synthetic polymer and ceramic teeth that are manufactured for use in prostheses used in dentistry.
BSR/ADA Specification No 53-200x, Polymer-Based Crown and Bridge Resins (national adoption with modifications and revision of ANSI/ADA 53-1999 (R2005))
Stakeholders: Dentists, dental laboratories, regulatory agencies.
Project Need: To revise the current ANSI/ADA Specification No. 53, Polymer-Based Crown and Bridge Resins, with slight modification of ISO 10477-2004.
Classifies polymer-based dental crown and bridge materials and specifies their requirements. It also specifies the test methods to be used to determine compliance with these requirements. This specification is applicable to polymer-based dental crown and bridge materials for laboratory fabricated permanent facings or anterior crowns that may or may not be attached to a metal substructure. It also applies to polymer-based dental crown and bridge materials for which the manufacturer claims adhesion to the metal substructure without macromechanical retention such as beads or wires.

AISI (American Iron and Steel Institute)
Office: 1140 Connecticut Avenue, NW
Suite 705
Washington, DC 20036
Contact: Helen Chen
Fax: (202) 463-6573
E-mail: Hchen@steel.org
BSR/AISI S905-07-200x, Test Method for Mechanically Fastened Cold-Formed Steel Connections (revision and redesignation of ANSI/AISI/COS TS-5-2002)
Stakeholders: Cold-formed steel manufacturers.
Project Need: This is a test procedure used by manufacturers and researchers in cold-formed steel design and analysis.
Describes several performance test methods that cover the determination of the strength and deformation of mechanically fastened connections for cold-formed steel building components, and are based extensively on test methods used successfully in the past. Connections in which the fasteners are stressed in shear (loads applied parallel to the shank of the fastener) and those in which the fasteners are stressed in tension (loads applied parallel to the shank of the fastener) are included. The objective is to evaluate actual field connections using standard test specimens and fixtures.
BSR/AISI S907-200x, Test Standard for Cantilever Test Method for Cold-Formed Steel Diaphragms (revision and redesignation of ANSI/AISI/COS TS-7-2002)
Stakeholders: Cold-formed steel manufacturers.
Project Need: This is a test procedure used by manufacturers and researchers in cold-formed steel design and analysis.
Covers the determination of the nominal diaphragm web shear strength and web shear stiffness, or flexibility, where framed wall, roof or floor cold-formed steel deck diaphragm construction is to be used.

Stakeholders: Owners, regulators, insurers, manufacturers, vendors and consultants.

Project Need: To combine four current Standards as a revision to ASME-RA-S in order to provide stability and consistency, since changes will be performed simultaneously across the entire Standard instead of in one Standard and not another.

Sets forth the requirements for probabilistic risk assessments (PRAs) used to support risk-informed decisions for commercial light water reactor nuclear power plants and prescribes methods for applying these requirements for specific applications.

BSR/ASTM Z3552Z/WK13482-200x, Determination of Total Aromatics and Total Saturates in Lube Basestocks by High Performance Liquid Chromatography (HPLC) with Refractive Index Detection (new standard)

Determines total saturates and combined total aromatics plus polars in non-additized lube basestocks in the concentration range of 1 - 50 mass% using high-performance liquid chromatography (HPLC) with refractive index (RI) detection.

BSR/HI 3.6-200x, Rotary Pump Tests (revision of ANSI/HI 3.6-2000)

Recognizes various performance test levels designed to permit a reasonable selection of tests, tolerances, and accuracy requirements appropriate for the application and the customer’s needs.

BSR C119.6-200x, Standard for Electric Connectors - Non-Sealed, Multiport Connector Systems Rated 600 Volts or Less for Aluminum and Copper Conductors (revision of ANSI C119.6-2006)

Covers non-sealed, multiport distribution connectors rated 600 volts or less used for making electrical connections between aluminum-to-aluminum, aluminum-to-copper, or copper-to-copper conductors for above grade, electric utility applications.
Standards Action - September 7, 2007 - Page 14 of 26 Pages

NEMA (ASC C78) (National Electrical Manufacturers Association)

Office: 1300 North 17th Street, Suite 1847
Rosslyn, VA 22209
Contact: Matt Clark
E-mail: Mat_clark@nema.org; ran_roy@nema.org

BSR/NEMA ANSI C78.377-200x, Specifications for the Chromaticity of Solid State Lighting Products for Electric Lamps (new standard)
Stakeholders: Manufacturers, consumers.
Project Need: To create a new standard for the specifications for the chromaticity of Solid State Lighting products for electric lamps.

BSR/SCTE 107-200x, Embedded Cable Modem Device Specification (revision of ANSI/SCTE 107-2003)
Stakeholders: Cable Telecommunications Industry.
Project Need: To revise the embedded cable modem device standard.

SCTE (Society of Cable Telecommunications Engineers)

Office: 140 Philips Road
Exton, PA 19341
Contact: Rebecca Quartapella
Fax: 610-363-5898
E-mail: rquartapella@scte.org

Stakeholders: Cable Telecommunications Industry.
Project Need: To revise the radio frequency interface standard.

BSR/SCTE 107-200x, Embedded Cable Modem Device Specification (revision of ANSI/SCTE 107-2005)
Stakeholders: Cable Telecommunications Industry.
Project Need: To revise the embedded cable modem device standard.

Defines additional features that must be added to a Cable Modem for implementations that embed the Cable Modem with another application, such as an IPCablecom MTA.

SPRI (Single Ply Roofing Institute)

Office: 77 Rumford Street Suite 3B
Waltham, MA 02453
Contact: Linda King
Fax: (781) 647-7222
E-mail: info@spri.org

BSR/SPRI RP-14-200x, Wind Design Standard for Vegetative Roofing Systems (new standard)
Stakeholders: Manufacturers of vegetative roof assemblies and related systems, designers, installers and building owners.
Project Need: With the growth of the vegetative roof industry, there are concerns about the lack of standards associated with wind uplift. This standard is being created to address this issue.

Provides design guidelines associated with wind uplift and stone scour defining items such as set backs from the edges of roofs in areas with high winds, use of wind erosion mats as well as edging details. There is a discussion of the various types of materials and their behavior under varying wind conditions.

BSR/SPRI VF-1-200x, Fire Design Standard for Vegetative Roofing Systems (new standard)
Stakeholders: Manufacturers of green roof and related systems, designers, installers, building owners.
Project Need: With the growth of the vegetative roof industry, there are concerns about the lack of standards associated with the prevention of fire on certain systems. This standard has been developed to address that need.

Describes design guidelines associated with preventing combustion and its spread. It will include design features such as minimum setbacks for plants from roof edge, walls to higher roofs, and penetrations with fire breaks used on large installations.

American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of those revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented consensus action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option:

- AAMI
- AAMVA
- AGA
- AGRSS, Inc
- ASHRAE
- ASME
- ASTM
- MHI (ASC MH10)
- NBBPVI
- NCPDP
- NSF International
- TIA
- Underwriters Laboratories, Inc. (UL)

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on “Standards Information,” and see “American National Standards Maintained Under Continuous Maintenance”. This information is also available directly at www.ansi.org/publicreview.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
ISO and IEC Draft International Standards

This section lists proposed standards that the International Organization for Standardization (ISO) and the International Electrotechnical Commission (IEC) are considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to ISO and IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments
Comments regarding ISO documents should be sent to Henrietta Scully at ANSI's New York offices, those regarding IEC documents to Charles T. Zegers, also at ANSI New York offices. The final date for offering comments is listed after each draft.

Ordering Instructions
ISO and IEC Drafts can be made available via ANSI's ESS "on-demand" service. Please e-mail your request for an ISO or IEC Draft to Customer Service at sales@ansi.org. The document will be posted to the ESS within 3 working days of the request. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

ISO Standards

ANAESTHETIC AND RESPIRATORY EQUIPMENT (TC 121)
ISO/DIS 16628, Tracheobronchial tubes - Sizing and marking - 12/7/2007, $46.00
ISO/DIS 27427, Anaesthetic and respiratory equipment - Nebulizing systems and components - 12/3/2007, $112.00

FEROUS METAL PIPES AND METALLIC FITTINGS (TC 5)
ISO/DIS 2531, Ductile iron pipes, fittings, accessories and their joints for water applications - 12/2/2007, $146.00

FINE CERAMICS (TC 206)
ISO/DIS 26424, Fine ceramics (advanced ceramics, advanced technical ceramics) - Determination of the abrasion resistance of coatings by a micro-scale abrasion test - 12/6/2007, $67.00

INFORMATION AND DOCUMENTATION (TC 46)
ISO/DIS 20775, Information and documentation - Schema for holdings information - 12/6/2007, $146.00

MACHINE TOOLS (TC 39)
ISO/DIS 13041-6, Machine tools - Test conditions for numerically controlled turning machines and turning centres - Part 6: Accuracy of a finished test piece - 12/8/2007, $62.00

MEDICAL DEVICES FOR INJECTIONS (TC 84)
ISO/DIS 20072, Aerosol drug delivery device design verification - Requirements and test methods - 12/2/2007, $98.00

NUCLEAR ENERGY (TC 85)
ISO/DIS 15646, Nuclear fuel technology - Resintering test for UO2, (U,Gd)O2 and (U,Pu)O2 pellets - 12/6/2007, $40.00

PLASTICS (TC 61)
ISO/DIS 6721-12, Plastics - Determination of dynamic mechanical properties - Part 12: Compressive vibration - Non-resonance method - 12/5/2007, $40.00

ROLLING BEARINGS (TC 4)
ISO/DIS 12090-2, Rolling bearings - Linear motion, recirculating ball and roller bearings, linear guideway type - Part 2: Boundary dimensions and tolerances for series 4 and 5 - 12/8/2007, $46.00

SAFETY DEVICES FOR PROTECTION AGAINST EXCESSIVE PRESSURE (TC 185)
ISO/DIS 4126-10, Safety devices for protection against excessive pressure - Part 10: Sizing of safety valves and connected inlet and outlet lines for gas/liquid two-phase flow - 12/6/2007, $119.00

WOOD-BASED PANELS (TC 89)
ISO/DIS 27528, Wood-based panels - Determination of resistance to axial withdrawal of screws - 12/2/2007, $40.00

ISO/IEC JTC 1, Information Technology

ISO/IEC DIS 11002, Information Technology - SNIA Multipath Management API Specification - 12/2/2007, $165.00

IEC Standards

18/1064/FDIS, IEC 61892-3 Ed.2: Mobile and fixed offshore units - Electrical installations - Part 3: Equipment, 10/26/2007
18/1065/FDIS, IEC 61892-6 Ed.2: Mobile and fixed offshore units - Electrical installations - Part 6: Installation, 10/26/2007
18/1066/FDIS, IEC 61892-7 Ed.2: Mobile and fixed offshore units - Electrical installations - Part 7: Hazardous areas, 10/26/2007
78/705/FDIS, IEC 61318: Live working - Conformity assessment applicable to tools, devices and equipment, 10/26/2007
80/494/FDIS, IEC 62388 Ed.1: Maritime navigation and radio-communication equipment and systems - Shipborne radar - Performance requirements, methods of testing and required test results, 10/26/2007
86B/2598/FDIS, IEC 60874-19-1 Ed. 3.0: Fibre optic interconnecting devices and passive components - Connectors for optical fibres and cables - Part 19-1: Fibre optic patch cord connector type SC-PC (floating duplex) standard terminated on multimode fibre type A1a, A1b - Detail specification, 10/26/2007
86B/2599/FDIS, IEC 60874-19-3 Ed. 2.0: Fibre optic interconnecting devices and passive components - Connectors for optical fibres and cables - Part 19-3: Fibre optic adaptor (duplex) type SC for multimode fibre connectors - Detail specification, 10/26/2007

48B/1796/FDIS, IEC 61076-3-110 Ed. 1.0: Connectors for electronic equipment - product requirements - Part 3-110: Rectangular connectors - Detail specification for shielded, free and fixed connectors for data transmission with frequencies up to 1 000 MHz, 11/02/2007

56/1232/FDIS, IEC 62429 Ed. 1.0: Reliability growth - Stress testing for early failures in unique complex systems, 11/02/2007

82/494/FDIS, IEC 62108 Ed.1: Concentrator photovoltaic (CPV) modules and assemblies - Design qualification and type approval, 11/02/2007

86B/2600/FDIS, IEC 61300-3-42 Ed. 1.0: Fibre optic interconnecting devices and passive components - Basic test and measurement procedures - Part 3-42: Examinations and measurements - Attenuation of single mode alignment sleeves and or adaptors with resilient alignment sleeves, 11/02/2007

Newly Published ISO and IEC Standards

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization – and IEC – the International Electrotechnical Commission. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Global Engineering Documents.

ISO Standards

AGRICULTURAL FOOD PRODUCTS (TC 34)
ISO 5529:2007, Wheat - Determination of the sedimentation index - Zeleny test, $61.00

AIRCRAFT AND SPACE VEHICLES (TC 20)
ISO 22538-1:2007, Space systems - Oxygen safety - Part 1: Design of oxygen systems and components, $82.00
ISO 22538-2:2007, Space systems - Oxygen safety - Part 2: Selection of metallic materials for oxygen systems and components, $71.00
ISO 22538-3:2007, Space systems - Oxygen safety - Part 3: Selection of non-metallic materials for oxygen systems and components, $61.00
ISO 22538-4:2007, Space systems - Oxygen safety - Part 4: Hazards analyses for oxygen systems and components, $54.00

ANAESTHETIC AND RESPIRATORY EQUIPMENT (TC 121)
ISO 8836:2007, Suction catheters for use in the respiratory tract, $61.00

CERAMIC TILE (TC 189)
ISO 13007-2/Cor1:2007, Ceramic tiles - Grouts and adhesives - Part 2: Test methods for adhesives - Corrigendum, FREE

COSMETICS (TC 217)
ISO 18415:2007, Cosmetics - Microbiology - Detection of specified and non-specified microorganisms, $77.00

DENTISTRY (TC 106)

FLUID POWER SYSTEMS (TC 131)
ISO 8434-2:2007, Metallic tube connections for fluid power and general use - Part 2: 37 degree flared connectors, $124.00

GEARS (TC 60)
ISO 21771:2007, Gears - Cylindrical involute gears and gear pairs - Concepts and geometry, $160.00

OPTICS AND OPTICAL INSTRUMENTS (TC 172)
ISO 17123-8:2007, Optics and optical instruments - Field procedures for testing geodetic and surveying instruments - Part 8: GNSS field measurement systems in real-time kinematic (RTK), $71.00

PAINTS AND VARNISHES (TC 35)
ISO 10283:2007, Binders for paints and varnishes - Determination of monomeric diisocyanates in isocyanate resins, $54.00

PAPER, BOARD AND PULPS (TC 6)
ISO 216:2007, Writing paper and certain classes of printed matter - Trimmed sizes - A and B series, and indication of machine direction, $54.00

PERSONAL SAFETY - PROTECTIVE CLOTHING AND EQUIPMENT (TC 94)
ISO 20344/Amd1:2007, Personal protective equipment - Test methods for footwear - Amendment 1, $14.00
ISO 20345/Amd1:2007, Personal protective equipment - Safety footwear - Amendment 1, $14.00
ISO 20346/Amd1:2007, Personal protective equipment - Protective footwear - Amendment 1, $14.00
ISO 20347/Amd1:2007, Personal protective equipment - Occupational footwear - Amendment 1, $14.00

PETROLEUM PRODUCTS AND LUBRICANTS (TC 28)
ISO 14596:2007, Petroleum products - Determination of sulfur content - Wavelength-dispersive X-ray fluorescence spectrometry, $48.00

PLASTICS (TC 61)

POWDER METALLURGY (TC 119)
ISO 3954:2007, Powders for powder metallurgical purposes - Sampling, $48.00

RUBBER AND RUBBER PRODUCTS (TC 45)
ISO 3582/Amd1:2007, Cellular plastic and cellular rubber materials - Determination of biodegradability of plastic materials under controlled composting conditions - Method by analysis of evolved carbon dioxide - Part 2: Gravimetric measurement of carbon dioxide evolved in a laboratory-scale test, $71.00

THERMAL INSULATION (TC 163)
ISO 15927-6:2007, Thermal insulation - Determination of the thermal conductivity of mineral or non-metallic materials for oxygen systems and components, $82.00

WELDING AND ALLIED PROCESSES (TC 44)
ISO 14855-2:2007, Determination of the ultimate aerobic biodegradability of plastic materials under controlled composting conditions - Method by analysis of evolved carbon dioxide - Part 2: Gravimetric measurement of carbon dioxide evolved in a laboratory-scale test, $71.00

ISO Technical Reports

MEASUREMENT OF FLUID FLOW IN CLOSED CONDUITS (TC 30)
PLASTICS PIPES, FITTINGS AND VALVES FOR THE TRANSPORT OF FLUIDS (TC 138)

ISO/TR 10465-2:2007, Underground installation of flexible glass-reinforced pipes based on unsaturated polyester resin (GRP-UP) - Part 2: Comparison of static calculation methods, $112.00

ISO/TR 10465-3:2007, Underground installation of flexible glass-reinforced pipes based on unsaturated polyester resin (GRP-UP) - Part 3: Installation parameters and application limits, $139.00

ISO/IEC JTC 1, Information Technology

ISO/IEC 14496-12/Cor3:2007, Information technology - Coding of audio-visual objects - Part 12: ISO base media file format - Corrigendum, FREE

ISO/IEC 17799/Cor1:2007, Information technology - Code of practice for information security management - Corrigendum, FREE

ISO/IEC JTC 1 Technical Reports

ISO/IEC TR 24731-1:2007, Information technology - Programming languages, their environments and system software interfaces - Extensions to the C library - Part 1: Bounds-checking interfaces, $160.00

IEC Standards

AUDIO, VIDEO AND MULTIMEDIA SYSTEMS AND EQUIPMENT (TC 100)

IEC 61937-9 Ed. 1.0 en:2007, Digital audio - Interface for non-linear PCM encoded audio bitstreams applying IEC 60958 - Part 9: Non-linear PCM bitstreams according to the MAT format, $37.00

IEC 62379-1 Ed. 1.0 en:2007, Common control interface for networked digital audio and video products - Part 1: General, $184.00

IEC 62481-1 Ed. 1.0 en:2007, Digital living network alliance (DLNA) home networked device interoperability guidelines - Part 1: Architecture and protocols, $269.00

IEC 62481-2 Ed. 1.0 en:2007, Digital living network alliance (DLNA) home networked device interoperability guidelines - Part 2: DLNA media formats, $242.00

AUTOMATIC CONTROLS FOR HOUSEHOLD USE (TC 72)

IEC 60730-2-17 Amd.2 Ed. 1.0 b:2007, Amendment 2 - Automatic electrical controls for household and similar use - Part 2-17: Particular requirements for electrically operated gas valves, including mechanical requirements, $42.00

IEC 60730-2-19 Amd.2 Ed. 1.0 b:2007, Amendment 2 - Automatic electrical controls for household and similar use - Part 2-19: Particular requirements for electrically operated oil valves, including mechanical requirements, $37.00

CLASSIFICATION OF HAZARDOUS AREAS AND INSTALLATION REQUIREMENTS (TC 31J)

IEC 60079-17 Ed. 4.0 b:2007, Explosive atmospheres - Part 17: Electrical installations inspection and maintenance, $120.00

DOCUMENTATION AND GRAPHICAL SYMBOLS (TC 3)

IEC/PAS 62469 Ed. 1.0 en:2007, Requirements concerning the interoperability between electromechanical and electrical applications in CAx-systems, $110.00

ELECTRIC WELDING (TC 26)

IEC 60974-10 Ed. 2.0 b:2007, Arc welding equipment - Part 10: Electromagnetic compatibility (EMC) requirements, $92.00

IEC 62135-2 Ed. 1.0 b:2007, Resistance welding equipment - Part 2: Electromagnetic compatibility (EMC) requirements, $82.00

ELECTRICAL ACCESSORIES (TC 23)

IEC 60320-1 Amd.1 Ed. 2.0 b:2007, Amendment 1 - Appliances couplers for household and similar general purposes - Part 1: General requirements, $37.00

IEC 60423 Ed. 3.0 b:2007, Conduit systems for cable management - Outside diameters of conduits for electrical installations and threads for conduits and fittings, $48.00

ELECTRICAL APPARATUS FOR EXPLOSIVE ATMOSPHERES (TC 31)

IEC 60079-29-2 Ed. 1.0 b:2007, Explosive atmospheres - Part 29-2: Gas detectors - Selection, installation, use and maintenance of detectors for flammable gases and oxygen, $210.00

FIBRE OPTICS (TC 86)

IEC/TR 62469 Ed. 1.0 en:2007, Guidance for residual stress measurement of optical fibre, $60.00

MEASURING EQUIPMENT FOR ELECTROMAGNETIC QUANTITIES (TC 85)

IEC 61557-12 Ed. 1.0 b:2007, Electrical safety in low voltage distribution systems up to 1 000 V a.c. and 1 500 V d.c. - Equipment for testing, measuring or monitoring of protective measures - Part 12: Performance measuring and monitoring devices (PMD), $201.00

NUCLEAR INSTRUMENTATION (TC 45)

IEC 60987 Ed. 2.0 b:2007, Nuclear power plants - Instrumentation and control important to safety - Hardware design requirements for computer-based systems, $110.00

IEC 60423 Ed. 1.0 b:2007, Nuclear power plants - Instrumentation and control systems important to safety - Management of ageing, $139.00

SEMICONDUCTOR DEVICES (TC 47)

IEC/TR 62258-4 Ed. 1.0 en:2007, Semiconductor die products - Part 4: Questionnaire for die users and suppliers, $76.00

IEC/TR 62258-7 Ed. 1.0 en:2007, Semiconductor die products - Part 7: XML schema for data exchange, $101.00

IEC 60747-4 Ed. 2.0 b:2007, Semiconductor devices - Discrete devices - Part 4: Microwave diodes and transistors, $225.00
SURFACE MOUNTING TECHNOLOGY (TC 91)
IEC 61193-2 Ed. 1.0 en:2007, Quality assessment systems - Part 2:
  Selection and use of sampling plans for inspection of electronic
  components and packages, $76.00

IEC 62421 Ed. 1.0 en:2007, Electronics assembly technology -
  Electronic modules, $60.00

SWITCHGEAR AND CONTROLGEAR (TC 17)
IEC/TR 61912-1 Ed. 1.0 b:2007, Low-voltage switchgear and
  controlgear - Overcurrent protective devices - Part 1: Application of
  short-circuit ratings, $82.00

IEC 62271-207 Ed. 1.0 b:2007, High-voltage switchgear and
  controlgear - Part 207: Seismic qualification for gas-insulated
  switchgear assemblies for rated voltages above 52 kV, $92.00

TERMINOLOGY (TC 1)
IEC 60050-102 Ed. 1.0 b:2007, International Electrotechnical
  Vocabulary - Part 102: Mathematics - General concepts and linear
  algebra, $201.00

ULTRASONICS (TC 87)
IEC 62127-1 Ed. 1.0 en:2007, Ultrasonics - Hydrophones - Part 1:
  Measurement and characterization of medical ultrasonic fields up to
  40 MHz, $201.00

IEC 62127-2 Ed. 1.0 en:2007, Ultrasonics - Hydrophones - Part 2:
  Calibration for ultrasonic fields up to 40 MHz, $201.00

IEC 62127-3 Ed. 1.0 en:2007, Ultrasonics - Hydrophones - Part 3:
  Properties of hydrophones for ultrasonic fields up to 40 MHz, $82.00

IEC Technical Specifications
ELECTRICAL INSTALLATIONS OF BUILDINGS (TC 64)
IEC/TS 61201 Ed. 2.0 b:2007, Use of conventional touch voltage limits
  - Application guide, $67.00

PIEZOELECTRIC AND DIELECTRIC DEVICES FOR FREQUENCY
  CONTROL AND SELECTION (TC 49)
IEC/TS 61994-1 Ed. 2.0 en:2007, Piezoelectric and dielectric devices
  for frequency control and selection - Glossary - Part 1: Piezoelectric
  and dielectric resonators, $82.00

IEC/TS 61994-4-1 Ed. 2.0 en:2007, Piezoelectric and dielectric devices
  for frequency control and selection - Glossary - Part 4-1:
  Piezoelectric materials - Synthetic quartz crystal, $37.00
Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on “Subscribe”.

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. Information Concerning

American National Standards

INCITS Executive Board

ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology

Call for Members

The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum for information technology developers, producers and users to create and maintain formal de jure IT standards. INCITS' mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with its oversight of programs of its 30+ Technical Committees. Additionally, the INCITS Executive Board exercises international leadership in its role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

The INCITS Executive Board seeks to broaden its membership base and is recruiting new participants in all membership categories:

- special interest (user, academic, consortia)
- non-business (government and major/minor SDOs)
- business (large/small businesses and consultants)

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, please contact Jennifer Garner at (202) 626-5737 or jgarner@itic.org.

INCITS Study Group on Security Best Practices

September 19, 2007 Formation Meeting and Call for Members

Membership Request Deadline: September 14, 2007

The INCITS Study Group on Security Best Practices was recently established to:

- study the security needs and requirements of the financial and insurance services industries and assess what is missing in current standards and practices.
- make a recommendation to the INCITS EB on an approach to create deployable best practices and frameworks for security in these industries. This may include creating Project Proposals for new INCITS Standards or Technical Reports.
- complete its work and submit its report for consideration at the January 2008 INCITS EB meeting.

The formation meeting of the INCITS Study Group on Security Best Practices will be held September 19, 2007 from 3:00 PM to 4:30 PM in conjunction with the Financial Services Technology (FST) Summit at The Boulders Resort in Arizona:

The Boulders Resort and Golden Door Spa (meeting room information – see hotel meeting board)
34631 North Tom Darlington Drive
Carefree, AZ 85377
PHONE: (866) 397-6520
http://www.theboulders.com/

Interested parties are invited to nominate representatives to the INCITS Study Group on Security Best Practices. Although participants may join the Study Group at any time, requests to establish membership are requested by September 14, 2007 to assist in planning for the formation meeting and should be submitted to the INCITS Secretariat (jgarner@itic.org). Membership is open to all directly and materially affected parties that meet attendance and voting requirements and pay the designated service fees.

ANSI Accredited Standards Developers

Administrative Reaccreditation

ASC Z535 – Safety Signs and Colors

Accredited Standards Committee Z535, Safety Signs and Colors has been administratively reaccredited at the direction of ANSI’s Executive Standards Council, under operating procedures revised to bring the document into compliance with the 2007 version of the ANSI Essential Requirements, effective September 4, 2007. For additional information, please contact: Ms. Jean French, Standards Approval Associate, NEMA; 1300 North 17th Street, Suite 1752, Rosslyn, VA 22209; PHONE: (703) 841-3252; FAX: (703) 841-3352; E-mail: jea_french@nema.org.

Approval of Reaccreditation

Air Conditioning Contractors of America (ACCA)

ANSI’s Executive Standards Council has approved the reaccreditation of the Air Conditioning Contractors of America (ACCA), an ANSI Organizational Member since 2002, under revised operating procedures for documenting consensus on proposed American National Standards, effective August 28, 2007. For additional information, please contact: Mr. Dick Shaw, Technical Education Consultant & Standards Manager, Air Conditioning Contractors of America, 2800 Shirlington Road, Suite 300, Arlington, VA 22206; PHONE: (231) 854-2454; E-mail: shawddd@aol.com.

ANSI Accreditation Program for Third Party Personnel Certification Agencies

Application for Accreditation

American Board of Multiple Specialties in Podiatry (ABMSP)

Comment Deadline: October 8, 2007

American Board of Multiple Specialties in Podiatry (ABMSP)
1350 Broadway - Suite 1705
New York, NY 10018

ABMSP has submitted formal application for accreditation by ANSI of the following scopes of this certification body:

- Primary Care in Podiatric Medicine
- Podiatric Surgery
- Diabetic Foot Wounds and Foot Wear

Please send your comments by October 8, 2007 to Roy Swift, Ph.D., Program Director, Personnel Certifier
Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036, Fax: (202) 293-9287 or e-mail: rswiftansi.org.
International Organization for Standardization (ISO)

Call for International (ISO) Secretariat

ISO/TC 154 – Processes, Data Elements and Documents in Commerce, Industry and Administration

Comment Deadline: September 28, 2007

ANSI has been advised Switzerland (SNV) no longer wishes to serve as Secretariat for the above ISO Technical Committee, which has the following scope:

International standardization and registration of business, and administration processes and supporting data used for information interchange between and within individual organizations and support for standardization activities in the field of industrial data.

Development and maintenance of application specific meta standards for: process specification (in the absence of development by other technical committees); data specification with content; forms-layout (paper/electronic).

Development and maintenance of standards for process identification (in the absence of development by other technical committees); data identification.

Maintenance of the EDIFACT-Syntax.

Anyone wishing the United States to assume the role of International Secretariat for ISO/TC 154 should contact Henrietta Scully at ANSI via e-mail: hscully@ansi.org by September 28th.

ISO/TC 193/SC 3 – Natural Gas – Upstream Area

Comment Deadline: September 21, 2007

ANSI has been advised The American Petroleum Institute (API) wishes to serve as delegated ANSI Secretariat for the above ISO subcommittee relinquished by Norway (SN).

This SC is covered by the scope of the main Technical Committee (ISO/TC 193), having the following scope:

Standardization of terminology, quality specifications, methods of measurement, sampling, analysis and test for natural gas and natural gas substitutes (gaseous fuel), in all its facets from production to delivery to all possible end users across national boundaries. Recognition of work related to natural gas in other technical committees and in liaison with these technical committees.

Anyone wishing to comment on the delegation of the International Secretariat to API should contact Henrietta Scully at ANSI via e-mail: hscully@ansi.org by September 21st.

Systematic Review of ISO Standards not Assigned to a Specific Technical Committee

Comment Deadline: November 16, 2007

It is the practice within ISO when an ISO Technical Committee (TC) is disbanded, existing ISO Standards, when requiring systematic review, be transmitted to ISO Member Bodies.

The following ISO Standards are before the ISO Member Bodies for consideration of being Reaffirmed, Revised or Withdrawn:

- ISO 8530:1986, Manganese and chromium ores – Experimental methods for checking the precision of sample division
- ISO 312:1986, Manganese ores – Determination of active oxygen content, expressed as manganese dioxide – Titrimetric method
- ISO 7990:1985, Manganese ores and concentrates – Determination of total iron content – Titrimetric method after reduction and sulfosalicylic acid spectrophotometric method
- ISO 4571:1981, Manganese ores and concentrates – Determination of potassium and sodium content – Flame atomic emission spectrometric method
- ISO 4294:1984, Manganese ores and concentrates – Determination of copper content – Extraction-spectrometric and spectrometric methods
- ISO 6130:1985, Chromium ores – Determination of total iron content – Titrimetric method after reduction
- ISO 310:1992, Manganese ores and concentrates – Determination of hygroscopic moisture content in analytical samples – Gravimetric method
- ISO 8542:1986, Manganese and chromium ores – Experimental methods for evaluation of quality variation and methods for checking the precision of sampling
- ISO 621:1981, Manganese ores – Determination of metallic iron content (metallic iron content not exceeding 2%) – Sulphosalicylic acid photometric method

A copy of the above ISO Standards can be obtained from ANSI’s eStandards Store (http://webstore.ansi.org/).

A recommended response and supporting comments on the US position for any or all of the above ISO Standards should be sent to Henrietta Scully at ANSI via e-mail: hscully@ansi.org, by close of business, November 16, 2007. Comments received supporting withdrawal will be presented for the AIC’s endorsement to be submitted to ISO.
3.4.1 COMPUTER ROOM AIR CONDITIONER (CRAC) - An air-cooled or water-cooled, special purpose air conditioner, factory assembled as a portable package, which is a self-contained combination of cooling and optional heating components. This equipment is intended to provide supplemental cooling only for Information Technology Equipment (ITE) and may contain network connections to ITE. It is intended to condition a single equipment room or space. It may contain condenser intake/exhaust grill(s) or separate ducts; and contain return air plenum with duct(s), filter, or grill(s) but is not designed for connection to an HVAC system. This equipment is to be installed in accordance with Article 645 of NFPA 70 (National Electrical Code) or in similar such locations.

11.2.1.1 A cord-connected single phase room air conditioner shall be provided with a factory installed LCDI or AFCI protection to reduce the risk of fire due to arcing faults in the power-supply cord. The LCDI or AFCI shall be installed as an integral part of the attachment plug or located in the supply cord within 300 mm (12 in.) of the attachment plug.

Exception: Computer room air conditioners are not required to have LCDI or AFCI protection.

34.1 The leakage current of a cord-connected room air conditioner shall be no more than 0.75 milliamperes when tested in accordance with 34.6 - 34.8.

Exception: The leakage current of a computer room air conditioner installed in accordance with Article 645 of NFPA 70 (National Electrical Code) or in similar such locations, shall be no more than 3.5 mA under the following conditions:

a) The product requires electromagnetic field suppression filtering for compliance with EMI regulations; and

b) The product is equipped with a grounding-type power supply cord and plug.
Standard for Industrial Trucks, Internal Combustion Engine-Powered, UL 558

PROPOSAL

7.2.7 External fuel-confining parts of a fuel filter, except a gasket or seal, shall conform with the requirements in 29.3. When the fuel confining parts are constructed of nonmetallic material, the assembly shall also conform with the requirements in 7.3. Additional factors which are to be taken into consideration when judging the equivalency of nonmetallic fuel confining parts are:

a) Mechanical strength,

b) Resistance to impact,

c) Moisture-absorptive properties,

d) Flammability, and

e) Resistance to distortion at temperatures to which the material is subjected under any conditions of usage.

7.3 Nonmetallic parts

7.3.1 A nonmetallic part in contact with gasoline or diesel fuel shall not show excessive volume change or loss of weight, when considered on the basis of its intended function, following immersion for 70 hours at a temperature of 23 ±2°C (73.4 ±3.6°F) in the test liquid specified in Table 7.1.

7.3.3 A nonmetallic part that is affected by aging shall not crack or show visible evidence of deterioration following exposure for 96 hours to oxygen at a pressure of 300 psi (2.1 MPa) and a temperature of 70°C (158°F).
1. New Requirements Regarding Inlets for Transfer Switches

PROPOSALS

1.14 These requirements cover enclosed inlets intended to facilitate connection of portable generators to transfer equipment switches.

15C.1 The requirements of 15C.2 through 15C.7 apply to enclosed multiple pole power inlets which are intended for use with transfer equipment switches to provide means for cord connection to a portable generator. These requirements do not apply to inlets consisting of single pole separable connectors.

15C.2 The inlet shall be of a construction with male phase and neutral mating contacts conductors. An inlet shall have a rating no less than the rating of the transfer switch to which it is intended to be connected.

15C.3 The inlet shall have sufficient number of poles to accommodate the ground, neutral, and all ungrounded supply conductors in one connector.

15C.4 The inlet shall be of a design such that the ground connection is the first connection made when inserting a plug, and is the last connection to be opened when removing the plug.

15C.5 The inlet shall be suitable for connection and disconnection under load.

15C.6 The inlet shall be completely enclosed. When intended for outdoor use in wet locations, enclosures shall comply with all requirements for Type 3, 3R, 3S, 4, 4X, 6, or 6P enclosures, as detailed in Section 6, Enclosure, with the cord connector installed as well as with the connector withdrawn.

15D.1 The requirements in 15D.2 through 15D.7 are applicable to transfer equipment switches which are provided with an integral multiple pole inlet for cord connection to a portable generator.

15D.2 An integral inlet shall be of a construction with male phase and neutral mating contacts conductors, and shall have a rating no less than the rating of the transfer switch to which it is connected.

15D.3 An inlet shall have sufficient number of poles to accommodate the ground, neutral, and all ungrounded supply conductors in one connector.

15D.4 An inlet shall be of a design such that the ground connection is the first connection made when inserting a plug, and is the last connection to be opened when removing the plug.

15D.5 An inlet shall be suitable for connection and disconnection under load.

15D.6 An inlet shall be arranged such that the current carrying parts of the inlet are energized only when a mating attachment connector is connected to the inlet.

15D.7 Transfer equipment switches with an inlet which are intended for outdoor use in wet locations shall comply with the requirements for Type 3, 3R, 3S, 4, 4X, 6, or 6P enclosures, as detailed in Section 6, Enclosure, with the cord connector installed as well as with the connector withdrawn. Transfer equipment switches with inlets which are intended only for use in dry locations shall comply with 41.62.

15D.8 Transfer equipment switches with an inlet shall be provided with branch circuit protection for the circuits supplied through the inlet, or shall be marked in accordance with 41.57. The rating of the branch circuit protection shall not be greater than the rating of the inlet.
15D.9 When provided with an inlet, transfer equipment switches which does not switch the neutral conductor shall be marked in accordance with 41.58.

15D.10 When provided with an inlet, transfer equipment switches which switch the neutral conductor shall be marked in accordance with 41.59.

15D.11 Transfer equipment switches with an inlet shall comply with 41.62.

41.57 Transfer equipment switches with an inlet that does not have integral branch circuit protection in the circuit supplied by the inlet shall be marked to indicate that external branch circuit protection shall be provided. The marking shall include the maximum current rating for this branch circuit protection.

41.58 When provided with an inlet, transfer equipment switches which do not switch the neutral conductor shall be marked to indicate they are suitable only for use with generators that do not have the neutral bonded to ground or the generator frame.

41.59 When provided with an inlet, transfer equipment switches which switch the neutral conductor shall be marked to indicate they are suitable only for use with generators having the neutral bonded to ground or the generator frame.

41.61 Enclosed inlets shall be provided with instructions or markings stating: "When used to power a structure, this inlet must be used in conjunction with a transfer switch" or the equivalent.

8. Clarification of Disconnecting Means Requirements

PROPOSAL

19.9 A transfer switch marked for service equipment use in accordance with 41.3, or 41.5 shall be provided with an externally accessible, manually operable means to disconnect all ungrounded supply conductors of both the normal and the alternate standby sources under any condition of the normal and alternate supplies.

Exception No. 1: An electrically operated switch or circuit breaker need not be capable of being externally disconnected by hand if it can be manually disconnected after opening a door.

Exception No. 2: The disconnecting means for control circuit conductors need not be externally accessible when all of the following conditions are met:

   a) The transfer switch is marked as shown in 41.62;

   b) The transfer capability is disabled when both normal and alternate standby power disconnects are open;

   c) The disconnecting means is accessible by opening the enclosure or removing a deadfront; and

   d) The construction complies with the exception to 19.12.

Exception No. 3: A transfer switch may be provided with a single disconnect on the normal source only when the alternate source is intended to be a feeder and the transfer switch is marked in accordance with 41.64.
