This section solicits public comments on proposed draft new American National Standards, including the national adoption of ISO and IEC standards as American National Standards, and on proposals to revise, reaffirm or withdraw approval of existing American National Standards. A draft standard is listed in this section under the ANSI-accredited standards developer (ASD) that sponsors it and from whom a copy may be obtained. Comments in connection with a draft American National Standard must be submitted in writing to the ASD no later than the last day of the comment period specified herein. Such comments shall be specific to the section(s) of the standard under review and include sufficient detail so as to enable the reader to understand the commenter's position, concerns and suggested alternative language, if appropriate. Please note that the ANSI Executive Standards Council (ExSC) has determined that an ASD has the right to require that interested parties submit public review comments electronically, in accordance with the developer's procedures.

Ordering Instructions for "Call-for-Comment" Listings
1. Order from the organization indicated for the specific proposal.
2. Use the full identification in your order, including the BSR prefix; for example, Electric Fuses BSR/SAE J554.
3. Include remittance with all orders.
4. BSR proposals will not be available after the deadline of call for comment.

Comments should be addressed to the organization indicated, with a copy to the Board of Standards Review, American National Standards Institute, 25 West 43rd Street, New York, NY 10036. Fax: 212-840-2298; e-mail: psa@ansi.org

• Standard for consumer products
Comment Deadline: January 25, 2009

UL (Underwriters Laboratories, Inc.)

Revisions

The following changes in requirements to the Standard for Tests for Flammability of Plastic Materials for Parts in Devices and Appliances, UL 94, are being proposed:

1. Correction for defining the units of measuring the afterflame and afterglow times to the nearest second.

Click here to see these changes in full, or look at the end of “Standards Action.”

Send comments (with copy to BSR) to: Raymond Suga, (631) 546-2593, Raymond.M.Suga@us.ul.com

Comment Deadline: February 9, 2009

AAMI (Association for the Advancement of Medical Instrumentation)

New National Adoptions

BSR/AAMI ST15883-1-200x, Washer-disinfectors - Part 1: General requirements, terms and definitions and tests (national adoption with modifications of ISO 15883-1:2006)

Specifies general performance requirements for washer-disinfectors (WD) and their accessories that are intended to be used for cleaning and disinfection of re-usable medical devices and other articles. It specifies performance requirements for cleaning and disinfection as well as for the accessories that can be required to achieve the necessary performance. The methods and instrumentation required for validation, and re-validation, after essential repairs, are also specified. Draft AAMI ST15883-01 is based on ISO 15883-1:2006 but contains substantive national deviations.

Single copy price: $20.00 (hardcopy)/Free [electronic] (AAMI members); $25.00 (List)

Obtain an electronic copy from: www.aami.org
Order from: AAMI Publications [PHONE: 1-800-249 8226; FAX: 1-301-206-9789]
Send comments (with copy to BSR) to: Jennifer Moyer, (703) 525-4890, jmoyer@aami.org

ADA (American Dental Association)

New National Adoptions

Specifies the requirements for dental separators used in connection with dental equipment in the dental treatment center. This standard specifies the efficiency in terms of the level of metal particulate capture and retention based on a laboratory test. It also includes requirements for safe functioning of the separator; marking; and instructions for use, operation, and maintenance.

Single copy price: $92.00

Obtain an electronic copy from: standards@ada.org
Order from: standards@ada.org
Send comments (with copy to BSR) to: standards@ada.org

ANS (American Nuclear Society)

Reaffirmations

BSR/ANS 15.2-1999 (R200x), Quality Control for Plate-Type Uranium-Aluminum Fuel Elements (reaffirmation of ANSI/ANS 15.2-1999)

Sets forth general requirements for the establishment and execution of a program designed to verify that the quality of plate-type uranium-aluminum fuel elements being purchased for research reactors conforms to the requirements of the contract and applicable technical documents, including specifications, standards, and drawings.

Single copy price: $50.00

Obtain an electronic copy from: orders@ans.org
Order from: Sue Cook, (708) 579-8210, orders@ans.org
Send comments (with copy to BSR) to: Patricia Schroeder, (708) 579-8289, pschroeder@ans.org

ASABE (American Society of Agricultural and Biological Engineers)

New Standards

BSR/ASABE S613-200x, Tractors and self-propelled machinery for agriculture - Air quality systems for cabs - Terminology and overview (new standard)

Applies to agricultural self-propelled machinery including tractors, as defined by ASABE S390.4. It covers terminology, definitions, and an overview of how cabs may be used in contaminated environments as part of an Occupational Health and Safety Management System.

Single copy price: $48.00

Obtain an electronic copy from: vangilder@asabe.org
Order from: Carla VanGilder, (269) 429-0300, vangilder@asabe.org
Send comments (with copy to BSR) to: Same

ASIS (ASIS International)

New Standards

Specifies requirements for an organizational resilience (OR) management system to enable an organization to develop and implement policies, objectives, and programs, taking into account legal requirements and other requirements to which the organization subscribes, information about significant hazards and threats that might impact it and its stakeholders', and protection of critical assets (physical, intangible, environment, and human). This standard applies to risks and/or their impacts that the organization identifies as those it can control, influence, or reduce. It does not itself state specific performance criteria.

Single copy price: $50.00

Order from: standards@asisonline.org
Send comments (with copy to BSR) to: Same
ASME (American Society of Mechanical Engineers)

Revisions

BSR/ASME BPVC Revision-200x, ASME Boiler and Pressure Vessel Code (04/25/08, 08/08/08, 11/14/08 and 02/06/09 Meetings) (revision of ANSI/ASME BPV Code 2007 Edition)
Establishes rules of safety, relating only to pressure integrity, governing the construction of boilers, pressure vessels, transport tanks and nuclear components, and in-service inspection for pressure integrity of nuclear components and transport tanks.
Single copy price: $37.00
Obtain an electronic copy from: http://cstools.asme.org/publicreview
Order from: Mayra Santiago, ASME; ANSlBOX@asme.org
Send comments (with copy to BSR) to: Joseph Bruszkwiewicz, ASME; bruszkwiewiczj@asme.org

ISA (ISA)

New Standards

BSR/ISA 5.1-200x, Instrumentation Symbols and Identification (new standard)
Establishes a uniform means of designating instruments and instrumentation systems used for industrial process measurement and control. To this end, a designation system is presented that includes symbols and an identification code.
Single copy price: $99.00
Obtain an electronic copy from: crobinson@isa.org

BSR/NGA R1.1-200x, Repair of Laminated Automotive Glass Standard (ROLAGS) (revision of ANSI/NGA R1.1-2007)
Final actions on American National Standards

The standards actions listed below have been approved by the ANSI Board of Standards Review (BSR) or by an ANSI-Audited Designator, as applicable.

AAMI (Association for the Advancement of Medical Instrumentation)

New National Adoptions

Reaffirmations

ABMA (ASC B3) (American Bearing Manufacturers Association)

Reaffirmations

ANSI/ABMA 25.2-1990 (R2008), Rolling Bearings, Linear Motion Recirculating Ball, Sleeve Type - Inch Series (reaffirmation of ANSI/ABMA 25.2-1990 (R1999)): 12/17/2008

**AGMA (American Gear Manufacturers Association)**

**Reaffirmations**

**Revisions**

**ASC X9 (Accredited Standards Committee X9, Incorporated)**

**Revisions**

**ASQ (American Society for Quality)**

**Reaffirmations**

ANSI/ASQ Z1.4-2003 (R2008), Sampling Procedures and Tables for Inspection by Attributes (reaffirmation of ANSI/ASQ Z1.4-2003): 12/19/2008

ATIS (Alliance for Telecommunications Industry Solutions)

**New Standards**

ANSI ATIS 0100022-2008, Priority Classification Levels for Next Generation Networks (new standard): 12/19/2008

IESNA (Illuminating Engineering Society of North America)

**Reaffirmations**

**ITI (INCITS) (InterNational Committee for Information Technology Standards)**

**New National Adoptions**

**New Standards**

**Reaffirmations**

Stabilized Maintenance: See 3.3.3 of the ANSI Essential Requirements

ANSI INCITS 137-1988 (S2008), Information Systems - One- and Two-sided, Unformatted, 90-mm (3.5-in), 5.3-tpmm (135-tpi) Flexible Disk Cartridge for 7958 BPR Use - General, Physical, and Magnetic Requirements (stabilized maintenance of ANSI INCITS 137-1988 (R2004)): 12/19/2008

ANSI INCITS 224-1994 (S2008), Extended Tape Format for Information Interchange, (18-Track, Parallel, 12.65 mm (0.50 in), 1491 cpm (37 871 cpi), Group-Coded Recording) (stabilized maintenance of ANSI INCITS 224-1994 (R2004)): 12/17/2008

ANSI INCITS 229-1994 (S2008), Fiber Distributed Data Interface (FDDI) Station Management (SMT) (stabilized maintenance of ANSI INCITS 229-1994 (R2004)): 12/17/2008

ANSI INCITS 242-1994 (S2008), Magnetic Tape Cartridge for Information Interchange,..50 in (12.65 mm) Serial Serpentine, 48-Track, 42 500 bpi (1 673 bppmm), DLT1 Format (stabilized maintenance of ANSI INCITS 242-1994 (R2004)): 12/17/2008

INCITS/ISO/IEC 11557-1992 (S2008), Information Technology - 3.81 mm Wide Magnetic Tape Cartridge for Information Interchange - Helical Scan Recording - DDS-DC Format Using 60 m and 90 m Length Tapes (stabilized maintenance of INCITS/ISO/IEC 11557-1992 (R2004)): 12/19/2008

New Standards

ANSI/VITA 42.0-2008, XMC (new standard): 12/19/2008
Project Initiation Notification System (PINS)

ANSI Procedures require notification of ANSI by ANSI-accredited standards developers (ASD) of the initiation and scope of activities expected to result in new or revised American National Standards (ANS). Early notification of activity intended to reaffirm or withdraw an ANS and in some instances a PINS related to a national adoption is optional. The mechanism by which such notification is given is referred to as the PINS process. For additional information, see clause 2.4 of the ANSI Essential Requirements: Due Process Requirements for American National Standards.

Following is a list of proposed actions and new ANS that have been received recently from ASDs. Please also review the section in Standards Action entitled "American National Standards Maintained Under Continuous Maintenance" for additional or comparable information with regard to standards maintained under the continuous maintenance option. To view information about additional standards for which a PINS has been submitted and to search approved ANS, please visit www.NSSN.org, which is a database of standards information. Note that this database is not exhaustive.

Directly and materially affected interests wishing to receive more information or to submit comments are requested to contact the standards developer directly within 30 days of the publication of this announcement.

AGMA (American Gear Manufacturers Association)
Office: 500 Montgomery Street, Suite 350
Alexandria, VA 22314-1560
Contact: Charles Fischer
Fax: (703) 684-0242
E-mail: fischer@agma.org

BSR/AGMA 9110-200x, Flexible Couplings - Potential Unbalance Classification (Metric Edition) (new standard)
Stakeholders: Manufacturers and users of flexible couplings in power transmission applications.
Project Need: To offer standard criteria for unbalance classification of flexible couplings.
Describes coupling unbalance and identifies its sources. This standard breaks down the requirements into usable groups and outlines how to calculate the potential unbalance of the coupling. A guide is provided for balance class selection for purchasers who have not defined the coupling balancing requirements for their system.

AIAA (American Institute of Aeronautics and Astronautics)
Office: 1801 Alexander Bell Drive, Suite 500
Reston, VA 20191-4344
Contact: Michele Ringrose
Fax: (703) 264-7551
E-mail: micheler@aiaa.org; craigd@aiaa.org

BSR/AIAA S-115-200x, LEO Spacecraft Charging Design Standard and Handbook (new standard)
Stakeholders: Satellite and space solar array manufacturers who build spacecraft to orbit in LEO.
Project Need: To provide design standards for Low Earth Orbit spacecraft designers.

ASABE (American Society of Agricultural and Biological Engineers)
Office: 2950 Niles Road
St Joseph, MI 49085
Contact: Carla VanGilder
Fax: (269) 429-3852
E-mail: vangilder@asabe.org

ANSI/ASAE S385.5-APR93 (RAPR2003), Combine Harvester Tire Loading and Inflation Pressures (withdrawal of ANSI/ASAE S385.5-APR93 (RAPR2003))
Stakeholders: Implement manufacturers and users.
Project Need: This standard is out-of-date. Up-to-date information is available from the Tire and Rim Association.
Establishes loadings and inflation pressures for agricultural type tires when used on self-propelled, hillside, and pull-type combine harvesters.

ANSI/ASAE S430.1-FEB96 (RAPR2003), Agricultural Equipment Tire Loading and Inflation Pressures (withdrawal of ANSI/ASAE S430.1-FEB96 (RAPR2003))
Stakeholders: Implement manufacturers and users.
Project Need: This standard is out-of-date. Up-to-date information is available from the Tire and Rim Association.
Establishes loadings and inflation pressures for agricultural-type tires when used in agricultural equipment service. Agricultural-type tires are not designed for highway vehicle use or to operate at speeds in excess of 40 km/h (25 mph).

ASME (American Society of Mechanical Engineers)
Office: 3 Park Avenue, 20th Floor (20N2)
New York, NY 10016
Contact: Mayra Santiago
Fax: (212) 591-8501
E-mail: ansibox@asme.org

BSR/ASME PTC 47.1-200x, Air Separation Unit (new standard)
Stakeholders: Refineries, power plants.
Project Need: To provide procedures for the conduct of a performance test code of Air Separation Unit of an Integrated Gasification Combined Cycle (IGCC).
Provides uniform test methods and procedures for the determination of the thermal performance of a cryogenic Air Separation Unit (ASU) providing oxygen to an integrated gasification combined cycle (IGCC). This Code provides explicit procedures for the determination of the following performance results - corrected net power input, ASU capacity, and corrected ASU effectiveness.
EIEA (Electronic Industries Alliance)

Office: 2500 Wilson Boulevard
         Suite 310
         Arlington, VA  22201
Contact: Cecelia Yates
Fax: (703) 875-8908
E-mail: cyates@ecaus.org

Stakeholders: Electrical, electronics and telecommunications

Project Need: To supersede current standard by EIA 364J-STD-002.

Describes a method for performing solderability testing of "loose contacts" by the solder dip technique, that is the preferred method of test for these components.
BSR/INCITS/ISO/IEC 25434-2007, Information technology - Data interchange on 120 mm and 80 mm optical disk using +R DL format - Capacity: 8.55 Gbytes and 2.66 Gbytes per side (recording speed up to 16X) (identical national adoption and revision of INCITS/ISO/IEC 25434-2007)

Stakeholders: ICT industry.
Project Need: To adopt this International Standard, which will be beneficial to the ICT industry.

Specifies the mechanical, physical and optical characteristics of 120-mm recordable optical disks with capacities of 8.55 Gbytes and 17.1 Gbytes. This standard specifies the quality of the recorded and unrecorded signals, the format of the data and the recording method, thereby allowing for information interchange by means of such disks.

The data can be written once and read many times using a non-reversible method. These disks are identified as +R DL.

NECA (National Electrical Contractors Association)
Office: 3 Bethesda Metro Centre
Bethesda, MD 20814
Contact: Nicholas Daly
Fax: (301) 215-4500
E-mail: nick.daly@necanet.org

BSR/NECA/FOA 301-200x, Standard for Installing and Testing Fiber Optic Cables (revision of ANSI/NECA FOA 301-2004)
Stakeholders: Electrical contractors and their customers.
Project Need: National Electrical Installation Standards (developed by NECA in partnership with other industry organizations) are the first performances standards for electrical construction. They go beyond the basic safety requirements of the National Electrical Code to clearly define what is meant by installing products and systems in a “neat and workmanlike” manner.

Describes procedures for installing and testing fiber optic cables and related components to carry signals for telecommunications, control, and similar purposes. These procedures represent a minimum level of quality for fiber optic installations. This standard is intended to define what is meant by installing equipment in a “neat and workmanlike manner”, as required by the National Electrical Code, Sections 110-12 and 770-8.

NGA (National Glass Association)
Office: 8200 Greensboro Dr., Ste. 302
McLean, VA 22102
Contact: Margaret Stroka
Fax: (717) 932-6885
E-mail: pegs@glass.org

BSR/NGA R1.1-200x, Repair of Laminated Automotive Glass Standard (ROLAGS) (revision of ANSI/NGA R1.1-2007)
Stakeholders: Manufacturers, companies, and general interest.
Project Need: To review, clarify and revise ROLAGS.

Defines: Repairable damages; The process of windshield repair; and - The performance criteria for repaired laminated glass. This standard shall also provide best practices for the training of a repair technician.

American National Standards Maintained Under Continuous Maintenance

The ANSI Essential Requirements: Due Process Requirements for American National Standards provide two options for the maintenance of American National Standards (ANS): periodic maintenance (see clause 4.7.1) and continuous maintenance (see clause 4.7.2). Continuous maintenance is defined as follows:

The standard shall be maintained by an accredited standards developer. A documented program for periodic publication of revisions shall be established by the standards developer. Processing of these revisions shall be in accordance with these procedures. The published standard shall include a clear statement of the intent to consider requests for change and information on the submittal of such requests. Procedures shall be established for timely, documented action on each request for change and no portion of the standard shall be excluded from the revision process. In the event that no revisions are issued for a period of four years, action to reaffirm or withdraw the standard shall be taken in accordance with the procedures contained in the ANSI Essential Requirements.

The Executive Standards Council (ExSC) has determined that for standards maintained under the Continuous Maintenance option, separate PINS announcements are not required. The following ANSI Accredited Standards Developers have formally registered standards under the Continuous Maintenance option:

- AAMI
- AAMVA
- AGA
- AGRSS, Inc.
- ASHRAE
- ASTM
- GEIA
- MHI (ASC MH10)
- NBBPVI
- NCPDP
- NISO
- NSF
- TIA
- Underwriters Laboratories, Inc. (UL)

To obtain additional information with regard to these standards, such as contact information at the ANSI accredited standards developer, please visit ANSI Online at www.ansi.org, select Internet Resources, click on “Standards Information,” and see “American National Standards Maintained Under Continuous Maintenance”. This information is also available directly at www.ansi.org/publicreview.

Alternatively, you may contact the Procedures & Standards Administration Department (PSA) at psa@ansi.org or via fax at 212-840-2298. If you request that information be provided via E-mail, please include your E-mail address; if you request that information be provided via fax, please include your fax number. Thank you.
This section lists proposed standards that the International Electrotechnical Commission (IEC) is considering for approval. The proposals have received substantial support within the technical committees or subcommittees that developed them and are now being circulated to IEC members for comment and vote. Standards Action readers interested in reviewing and commenting on these documents should order copies from ANSI.

Comments

Comments regarding IEC documents should be sent to Charles T. Zegers, at ANSI's New York offices. The final date for offering comments is listed after each draft.

Ordering Instructions

IEC Drafts can be made available by contacting ANSI's Customer Service department. Please e-mail your request for an IEC Draft to Customer Service at sales@ansi.org. When making your request, please provide the date of the Standards Action issue in which the draft document you are requesting appears.

2/1534/FDIS, IEC 60034-15 Ed.3: Rotating electrical machines - Part 15: Impulse voltage withstand levels of form-wound stator coils for rotating a.c. machines, 02/13/2009

4/242A/FDIS, IEC 62097 Ed. 1.0: Hydraulic machines, radial and axial - Performance conversion method from model to prototype, 01/16/2009

25/403/FDIS, ISO 80000-12 Ed.1: Quantities and units - Part 12: Solid state physics, 02/06/2009

45A/724/FDIS, IEC 60964 Ed.2: Nuclear Power Plants - Control rooms - Design, 02/06/2009

45A/725/FDIS, IEC 62003 Ed.1: Nuclear power plants - Instrumentation and control important to safety - Requirements for electromagnetic compatibility testing, 02/13/2009

46C/878/FDIS, IEC 61156-5: Multicore and symmetrical pair/quad cables for digital communications - Part 5: Symmetrical pair/quad cables with transmission characteristics up to 1 000 MHz - Horizontal floor wiring - Sectional specification, 02/06/2009

62B/727/FDIS, IEC 60601-2-44 Ed.3: Medical electrical equipment - Part 2-44: Particular requirements for basic safety and essential performance of X-ray equipment for computed tomography, 02/13/2009

62D/735/FDIS, IEC 60601-2-21 Ed. 2: Medical electrical equipment - Part 2-21: Particular requirements for basic safety and essential performance of infant radiant warmers, 02/13/2009

62D/736/FDIS, IEC 60601-2-50 Ed.2: Medical electrical equipment - Part 2-50: Particular requirements for basic safety and essential performance of infant phototherapy equipment, 02/13/2009

86B/2807/FDIS, IEC 61300-2-48 Ed. 2.0: Fibre optic interconnecting devices and passive components - Basic test and measurement procedures - Part 2-48: Tests - Temperature-humidity cycling, 02/20/2009

86B/2808/FDIS, IEC 61300-3-3 Ed. 3.0: Fibre optic interconnecting devices and passive components - Basic test and measurement procedures - Part 3-3: Examinations and measurements - Active monitoring of changes in attenuation and return loss, 02/20/2009

100/1490/FDIS, IEC 62516-1: Terrestrial digital multimedia broadcasting (t-dmb) receivers - Part 1: Basic requirement, 02/06/2009
Newly Published ISO Standards

Listed here are new and revised standards recently approved and promulgated by ISO - the International Organization for Standardization. Most are available at the ANSI Electronic Standards Store (ESS) at www.ansi.org. All paper copies are available from Standards resellers (http://webstore.ansi.org/faq.aspx#resellers).

ISO Technical Specifications

INDUSTRIAL AUTOMATION SYSTEMS AND INTEGRATION (TC 184)

ISO/TS 10303-1315:2008, Industrial automation systems and integration - Product data representation and exchange - Part 1315: Application module: Mechanical design presentation representation with draughting, $149.00

Proposed Foreign Government Regulations

Call for Comment

U.S. manufacturers, exporters, regulatory agencies and standards developing organizations may be interested in proposed foreign technical regulations issued by Member countries of the World Trade Organization (WTO). In accordance with the WTO Agreement on Technical Barriers to Trade (TBT Agreement), Members are required to report proposed technical regulations that may significantly affect trade to the WTO Secretariat in Geneva, Switzerland. In turn, the Secretariat disseminates the information to all WTO Members. The purpose of this requirement is to provide global trading partners with an opportunity to review and comment on the regulations before they become final.

The National Center for Standards and Certification Information (NCSCI) at the National Institute of Standards and Technology (NIST), distributes these proposed foreign technical regulations to U.S. stakeholders via an online service, Notify U.S. Notify U.S. is an e-mail and Web service that allows interested U.S. parties to register, obtain notifications, and read full texts of regulations from countries and for industry sectors of interest to them. To register for Notify U.S., please go to Internet URL: http://www.nist.gov/notifyus/ and click on “Subscribe”.

NCSCI is the WTO TBT Inquiry Point for the U.S. and receives all notifications and full texts of regulations to disseminate to U.S. Industry. For further information, please contact: NCSCI, NIST, 100 Bureau Drive, Gaithersburg, MD 20899-2160; Telephone: (301) 975-4040; Fax: (301) 926-1559; E-mail: ncsci@nist.gov or notifyus@nist.gov.
American National Standards
INCITS Executive Board
ANSI Accredited SDO and US TAG to ISO/IEC JTC 1, Information Technology
The InterNational Committee for Information Technology Standards (INCITS), an ANSI accredited SDO, is the forum for information technology developers, producers and users to create and maintain formal de jure IT standards. INCITS’ mission is to promote the effective use of Information and Communication Technology through standardization in a way that balances the interests of all stakeholders and increases the global competitiveness of the member organizations.

The INCITS Executive Board serves as the consensus body with its oversight of programs of its 30+ Technical Committees. Additionally, the INCITS Executive Board exercises international leadership in its role as the US Technical Advisory Group (TAG) to ISO/IEC JTC 1, Information Technology.

The INCITS Executive Board seeks to broaden its membership base and is recruiting new participants in all membership categories:
- special interest (user, academic, consortia)
- non-business (government and major/minor SDOs)
- business (large/small businesses and consultants)

Membership in the INCITS Executive Board is open to all directly and materially affected parties in accordance with INCITS membership rules. To find out more about participating on the INCITS Executive Board, please contact Jennifer Garner at 202-626-5737 or jgarner@itic.org.

PINS Correction
BSR/AISC N690-200x
A PINS listing that appeared in the December 19, 2008 edition of Standards Action, under American Institute of Steel Construction, listed an incorrect edition of the standard being affected. The correct project action is as follows:

BSR/AISC N690-200x, Specification for Safety-Related Steel Structures for Nuclear Facilities (revision of ANSI/AISC N690-2006)

Tentative Interim Amendments
ANSI/IAPMO UPC 1-2009, Uniform Plumbing Code
Comment Deadline: Friday, January 9, 2009
The following Tentative Interim Amendments to the Uniform Plumbing Code, UPC 1-2009, is available for public review:
- TIA UPC 001-09 revises text in Sections 211.0 and 405.2
- TIA UPC 003-09 revises text in IAPMO Installation Standard 07-2008

Copies may be obtained from:
Lynne Sinnick
Director of Code Development,
IAPMO
5001 E. Philadelphia Street
Ontario, CA 91761
PHONE: (909) 472-4110
E-mail: lynne.sinnick@iapmo.org

ANSI Accredited Standards Developers
Approval of Reaccreditation
National Floor Safety Institute (NFSI)
ANSI’s Executive Standards Council has approved the reaccreditation of the National Floor Safety Institute (NFSI), an ANSI Organizational Member, under its recently revised operating procedures for documenting consensus on proposed American National Standards, effective December 22, 2008. For additional information, please contact: Mr. Russell Kendzior, President, National Floor Safety Institute, P.O. Box 76092, Southlake, TX 76092; PHONE: (817) 749-1700; FAX: (817) 749-1702; E-mail: russk@nfsi.org.

Reaccreditation
ASC B3 – Ball and Roller Bearings
Comment Deadline: January 26, 2009
Accredited Standards Committee B3, Ball and Roller Bearings, has submitted revisions to the operating procedures under which it was last reaccredited in 2006. As these revisions appear to be substantive in nature, the reaccreditation process is initiated.

To obtain a copy of ASC B3’s revised operating procedures, or to offer comments, please contact the Secretariat of ASC B3: Mr. James Converse, Technical Director, ASC B3/American Bearing Manufacturers Association, 2025 M Street, NW, Suite 800, Washington, DC 20036; PHONE: (202) 367-1155; FAX: (202) 367-2155; E-mail: Jconverse1@inc.r.com. You may view/download a copy of the revisions during the public review period at the following URL:
http://publicaa.ansi.org/sites/apdl/Documents/Forms/AllItems.aspx?RootFolder=%2fsites%2fapdl%2fDocuments%2fStandards%2020Activities%2fpPublic%20Review%20and%20Comment%2fANSI%20Accreditation%20Actions&View=%7b21C60355%2dAB17%2d4CD7%2dA090%2dBA6EECE5D7C60%7d.

As these revisions are available electronically, the public review period is 30 days. Please submit your comments to ABMA by January 26, 2009, with a copy to the Recording Secretary, ExSC in ANSI’s New York Office (FAX: (212) 840-2298; E-mail: dthompson@ANSI.org).
ANSI Accreditation Program for Third Party Personnel Certification Agencies

Application for Accreditation
NCMS, The Society of Industrial Security Professionals

Comment Deadline: January 26, 2009
NCMS, The Society of Industrial Security Professionals
994 Old Eagle School Road, Suite 1019
Wayne, PA 19087-1866

NCMS, SISP has submitted formal application for accreditation by ANSI of the following scopes of this certification body:
- Industry Safety Professional

Please send your comments by January 26, 2009 to Roy Swift, Ph.D., Program Director, Personnel Certifier Accreditation, American National Standards Institute, 1819 L Street, NW, 6th Floor, Washington, DC 20036, FAX: (202) 293-9287 or E-mail: rswift@ansi.org.

International Organization for Standardization (ISO)

Call for International (ISO) Secretariat
ISO/TC 212 – Clinical Laboratory Testing and in vitro Diagnostic Test Systems

ANSI has been informed by the Clinical and Laboratory Standards Institute (CLSI), the ANSI delegated Secretariat of ISO/TC 212, Clinical Laboratory testing and in vitro diagnostic test systems, that they wish to relinquish the delegation of the secretariat of the ISO Technical Committee.

The scope of ISO/TC 212 is as follows:
Standardization and guidance in the field of laboratory medicine and in vitro diagnostic test systems. This includes, for example, quality management, pre- and post-analytical procedures, analytical performance, laboratory safety, reference systems and quality assurance.

Excluded:
- generic quality management standards dealt with by ISO/TC 176;
- quality management standards for medical devices dealt with by ISO/TC 210;
- reference materials guidelines dealt with by the ISO Committee on Reference Materials (REMCO);
- conformity assessment guidelines dealt with by the ISO Committee on Conformity assessment (CASCO).

Information concerning the United States retaining the role of international secretariat may be obtained by contacting Rachel Howenstine, ANSI, rhowenstine@ansi.org, for further information.

Relinquishment of International (ISO) Secretariat

Comment Deadline: January 22, 2009
ISO/TC 67 - Materials, equipment and offshore structures for petroleum, petrochemical and natural gas industries

ANSI has been advised by the American Petroleum Institute (API), that they no longer wish to serve as delegated secretariat for ISO/TC 67.

The scope of the ISO/TC 67 is as follows:
Standardization of the materials, equipment and offshore structures used in the drilling, production, transport by pipelines and processing of liquid and gaseous hydrocarbons within the petroleum, petrochemical and natural gas industries.

Excluded: aspects of offshore structures subject to IMO requirements (ISO/TC 8).

Should Henrietta Scully at ANSI (hscully@ansi.org) not receive any requests for the US retaining this International Secretariat by January 22, 2009, ANSI will advise ISO that the United States is relinquishing the secretariat of ISO/TC 67.
The following changes in requirements to the Standard for Tests for Flammability of Plastic Materials for Parts in Devices and Appliances, UL 94, are being proposed:

1. Correction for defining the units of measuring the afterflame and afterglow times to the nearest second.

PROPOSAL

8.5.5.2 After the application of the flame to the specimen for 10 ± 0.5 seconds, immediately withdraw the burner at a rate of approximately 300 mm/sec, to a distance at least 150 mm away from the specimen and simultaneously commence measurement of the afterflame time \( t_1 \) to the nearest half second.

8.5.6 As soon as afterflaming of the specimen ceases, even if the burner has not been withdrawn to the full 150 mm distance from the specimen, immediately place the burner again under the specimen and maintain the burner at a distance of 10 ± 1 mm from the remaining major portion of the specimen for an additional 10 ± 0.5 seconds, while moving the burner clear of dropping material as necessary as indicated in 8.5.5.1. After this application of the flame to the specimen, immediately remove the burner at a rate of approximately 300 mm/sec to a distance of at least 150 mm from the specimen and simultaneously commence measurement of the afterflame time, \( t_2 \), and the afterglow time, \( t_3 \) to the nearest half second. Record \( t_2 \) and \( t_3 \). The laboratory fume hood shall be evacuated after each specimen.

Note 1: If it is difficult to visually distinguish between flaming and glowing, a small piece of cotton, approximately 50 mm square as described in 5.13, is to be brought into contact with the area in question by holding with tweezers. Ignition of the cotton will be indicative of flaming.

Note 2: If the test flame is extinguished during either flame application the test specimen is to be disregarded and another specimen is to be tested. The only exception is in the case where the test flame is extinguished as a direct result of out-gassing from the specimen. In this case, the burner shall be reignited immediately and reapplied to the specimen so that the total time of application is 10 ± 0.5 seconds.

9.5.7 After the fifth application of the test flame for each specimen, observe and record the following:

a) Afterflame time and afterglow time to the nearest second.

b) Whether or not specimens drip particles and whether the particles ignited the cotton indicator.

11.5.6 As soon as afterflaming of the specimen ceases, even if the burner has not been
withdrawn to the full 150 mm distance from the specimen, immediately place the burner under the specimen and maintain the burner at a distance of 10 ±1 mm from the remaining portion of the specimen, while moving the burner clear of dropping material as necessary. After this application of the flame to the specimen for 3 ±0.5 seconds, immediately remove the burner at a rate of approximately 300 mm/sec to a distance of at least 150 mm from the specimen and simultaneously commence measurement of the afterflame time, \( t_2 \), and the afterglow time, \( t_3 \), of the specimen. Record \( t_2 \) and \( t_3 \) to the nearest half second.

12.5.8 Record the time to the nearest second when:

a) The flaming ceases (afterflame).

b) The flaming and glowing ceases (afterglow).

c) The flaming or glowing front reaches the 125 mm gauge mark, or when the specimen ceases to burn or glow before the 125 mm gauge mark.
